Field Meetings

REF: SGAW 2628, 10 September 1953; OIRA-1679, 18 September 1953.

1. Per request, BGFiend [   ] will regularly file reports of matters covered at field meetings. In this case, and in the case of [   ] July visit to Athens, reports were not filed as items on the agenda were primarily field problems of long standing with which you were sufficiently familiar to obviate the need for special reporting in our opinion. Naturally any matters of major consequence were made the subject of cable or dispatch traffic. For example, in para 3 of reference, you point out that decisions regarding the Psych program were reached during [   ] visit and not properly reported. From our vantage point we know this not to be the case as [   ] initiated a [   ] approach to current Psych problems well in advance of [   ] visit and proposals for an expanded P/W cable were cabled to Headquarters as [   ] program (see [   ] 245). Possibly if they had been presented as individual country plans rather than as a package proposition, you would have been aware of our intentions sooner and [   ] would not have been in the air for so long awaiting response to the general cable. Your observations on this would be appreciated.

2. In response to your query in paras (c), (d), and (j) of SGAA 5319, it is believed items (d) and (j) have been covered in recent dispatch traffic. In summary we are hoping to utilize the USEP route on certain disposal cases of individuals with good background and [   ] present status and his aspirations to a position in New York were the subject of second ref. With regard to para (c), the original dispatch was in error. We were merely making a routine inquiry into GACCESS' status rather than considering him for HTGrubby. The fact we did not have a current report prompted us to raise this query.
